

CHADSWORTH COLUMNS

POLYURETHANE FINISHING TIPS

Chadsworth Incorporated's™ products are factory-primed and ready to finish. They may be painted, stained, or faux finished. Fill screw or nail holes using a vinyl spackle or plastic filler. If the primed finish has been scratched or damaged, the area should be spackled, sanded and touched up with primer prior to painting.

Chadsworth recommends a quality latex or oil-based paint for a smooth, solid finish. If you are preparing a faux finish, including woodgrain, use an impenetrable glazing stain or paint. **DO NOT** use lacquer based paint products on Chadsworth polyurethane products.
