Atlantic
Premium Shutters™

Enduring beauty and graceful charm for your home

Atlantic Premium Shutters are handcrafted using the most advanced modern materials. Each shutter is custom made with old world craftsmanship to your exact specifications. We use propriety, state of the art techniques that have been meticulously developed over the past fifteen years to ensure that you receive the finest made shutters.

We encourage you to review this catalog and select the shutter style that is right for your home. Whether you choose a shutter from our Architectural or Classic Collections you will know that the finest operable and fully functional shutters will be on your home.

Architectural Collection

These premier shutters are operable and fully functional, completely custom and beautifully detailed to a museum quality level. They offer an industry leading lifetime structural and 15 year finish warranty.

Classic Collection

These operable shutters offer a variety of styles and options that are designed to enhance any home. They are maintenance free and warranted for ten years.

Architectural Collection

The Architectural Collection is based on over fifteen years of composite shutter experience. Our goal is to provide the most beautiful and best performing shutters. In order to reach this goal we developed and continue to refine the process of bringing together the best technology from the aerospace, marine and automotive industries to make these shutters. The materials we use may cost a little more, but we are not about cost cutting. Our guarantee to you is that all Architectural Collection Shutters will withstand the effects of time.

Material

Our shutters use premium materials and are intended to be substantial in weight in order to provide a strong and beautiful shutter that maintains a lifetime of structural integrity.

Stiles and Louvers – Using marine grade fiberglass that is impervious to the elements, our patented design offers the strongest and most durable frame available on any composite shutter today. This is the same fiberglass material used on luxury yachts and racing boats.

Panels – Made from a proprietary composite wood material that is moisture, rot and termite resistant. This material is manufactured via a patented steam injection technology process that uses 90% wood with phenolic resins, zince borate and other ingredients.

Rails – Uses Structural grade PVC which allows for customization of rail sizes.

Assembly

Each shutter is hand assembled and individually built on-site in our facility to your exacting specifications.

We use specially formulated urethane adhesives that allow for a clean and smooth finish without nail, screw or rivet marks. These adhesives are the same used to hold fiberglass shells on automotive frames.

Finish

We use a specially formulated industrial two part acrylic urethane finish that chemically bonds to the shutter material. Every shutter receives a finishing process that includes two finish coats and a proprietary oven curing process to further strengthen and enhance the finish.

By partnering with the world leader in finishes, we have the ability to match any color with a 100% color match guarantee.

Warranty

Limited lifetime structural component warranty against, cracking, splitting, rotting and excessive warping.

Fifteen-year factory paint finish warranty against peeling or flaking.

See warranty document on our web site www.columns.com

Architectural Collection

Raised Panel

Raised Panel shutters are an ideal enhancement to federal manor homes, traditional colonial homes, quaint craft cottages and other architectural style homes.

Atlantic's Raised Panel shutters are built one at a time, to your specifications, so the choices are only limited by your imagination.

Whether you select the ever-popular two panel design or one of the other styles shown, we have the shutters you want.

Architectural Collection

Bahama

Atlantic's Bahama shutters have been a long-time favorite of coastal / tropical areas and desert communities with their beautiful architectural style. The authentic Caribbean styling allows cool breezes and soft diffused light to pass through. These shutters also offer privacy, comfort, and protection from the detrimental effects of the baking sun on floors, furniture and draperies.

Bahama shutters are hand assembled entirely from thermally stable, pultruded fiberglass. To preserve the aesthetic integrity of its clean lines, no unsightly mechanical fasteners are used in construction.

additional vertical mullion

Classic Collection

The Classic Collection was developed and designed over five years ago around a modern, solid core composite material. These traditionally styled shutters use the latest technology, are maintenance free and can be installed as either operable or fixed shutters. They are offered in the most common styles with selected options and provide an added level of distinction to any home.

Material

We use a proprietary composite wood material for all the components of this shutter. This material is manufactured via a patented steam injection technology process that uses 90% wood with phenolic resins, zinc borate and other ingredients that make this material moisture, rot and termite resistant.

Our proprietary composite wood material is substantial in weight which provides strength and structural integrity for years to come. We do not use pre-fabricated, stamped, molded, or vacuum formed materials when building our classic shutters.

Assembly

Each shutter is hand assembled and individually built on-site in our facility.

Use a specially formulated catalyst adhesive intended solely for use with our proprietary composite material. After assembly each shutter is hand sanded to a smooth finish.

Finish

Every shutter receives a finishing process that includes a primer coat, two finish coats and a proprietary oven curing process to further strengthen and enhance the finish. Our finishing coats use a specially formulated industrial two part acrylic urethane finish that chemically bonds to the shutter material.

By partnering with the world leader in finishes, we have the ability to match any color with a 100% color match guarantee

Warranty

Ten-year structural component warranty against, cracking, splitting, rotting and excessive warping.

Ten-year factory paint finish warranty against peeling or flaking.

Hardware

Shutters are mounted with historically correct operable hardware. Unlike “fixed mounted” shutters, this hardware sets the shutter off from the house and allows the shutter to be closed within the window frame. This adds dimension and an elegant accent to your home.

This hardware is forged from 300 series stainless steel and has a matte black powder coated finish. Bahama style shutters are mounted with aluminum hardware.
